

A4T Humanitarian Aid Shipment #7 through the Denton Program: **951 boxes** weighing 25,569 lbs. were moved from Castle Rock and Aurora, CO to Peterson Air Force Base on 12-17-2007. They were loaded then unloaded with the help of the **New Hope Men's Fellowship** (NHMF) volunteers - pictured left and below:

Approx. 700 boxes, that had been stored in Castle Rock for many months, were transported by the NHMF in several trucks, vans and the large bus shown above. These boxes of humanitarian supplies included hand knit wool garments, blankets, shoes, clothing, sewing supplies, medical equipment, seed packets, books and more.

**Handicapped Children of Afghanistan Charity** started by the late Khadija Omar (below), and continued in her honor by her daughter Hassina, raised money for wheelchairs and crutches for Afghanistan last year. These items filled 258 boxes shown

in the two trucks (on the right) which transported these supplies from Aurora to Peterson. Khadija and her late husband Dr. Abdullah Omar were always involved in helping the less fortunate people of Afghanistan.

All these boxes were loaded on pallets, airlifted to Bagram AB, via Ramstein AB, Germany, and then brought by A4T representatives to our Kabul Office in January 2008. We thank Najibullah Sedeque and Najib Mojaddidi for all their help with this delivery and storage of these boxes (and future distribution).

This was the last of the **New Hope Men's Fellowship** shipments to Afghanistan. A4T is very grateful to all these volunteers, especially Joe Howard, Afghanistan Project Coordinator, and his assistant, John Mullans of Castle Rock, CO.

Seven shipments have been sent from Castle Rock under the Denton Program since 2002. The Denton Program is a US Government program (under the State Dept. and USAID) to ship humanitarian aid from the US to countries around the world at government expense.

As soon as the customs personnel have approved of these boxes, the items will be distributed to the Afghans who greatly need them.
