

Farda-e-Afghanan Private School

Science Fair Report

To: Afghans4Tomorrow Main Office

In order to build capacity among students, especially in critical thinking, Farda-e-Afghanan Private School wrote a proposal and Afghans4tomorrow, Inc. has graciously accepted to fund our annual science fair project. The school leadership is thankful for this generous grant and hopes to continue its partnership with A4T, Inc. This is the third science fair project organized by the staff of the school with technical support from A4T, Inc.

On November 8, 2012, selected students presented their findings in front of a jury, students, parents, and guests. The jury was composed of A4T board members, members of the 7th district education directorate, and the vice principal for administrative affairs.

The fair started at 9:30 AM, 20 male and female students participated in the science fair project in 10 groups. Students were divided in two categories, from eight and tenth grades.

(Members of the jury discussing results)

(Third Science Fair students from 8th & 10th grades)

(Parents and guests examining the projects)

(Awards announced in front of the school, parents, and guests)

Students' presentations of their science research projects.

The table below shows the students' results:

	Awards	Student's name *	Topic of Research	Class
1	First place		Flower sensitivity against sun	Tenth grade
2	First place		Relation between density and heat	Eight grade
3	Second place		Plants growth in two elements: white compost and metal rust	Eight grade
4	Second place		Cleaning water microbes with oregano	Tenth grade
5	Third place		Thunder and electricity	Eight grade
6	Third place		Mud dust and earth dust	Eight grade
7	Third place		Flowers color formation	Tenth grade
8	Third place		Diminishing pollution with worms	Tenth grade
9	Third place		Sound traveling through liquid and gas	Tenth grade
10	Third place		Earth and greenhouse temperature	Tenth grade

(* removed by A4T before posting to A4T's website)

The school's staff and A4T wish this same annual science fair program would spread to all the Afghan schools.

Sincerely,

Farda-e-Afghanan Private School principal
